## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a process for preparing solid polymeric pressure sensitive adhesives wherein the monomers are not pre-emulsified prior to contact with the non-free radical polymerizable acid, classified in class 526, subclass 89.
  - II. Claims 14-27, drawn to a process for preparing solid polymeric pressure sensitive adhesives wherein the monomers are pre-emulsified prior to contact with the non-free radical polymerizable acid, classified in class 526, subclass 89.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions are not disclosed as capable of use together and have different modes of operation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a) Wherein the process is as described in claim 10.
- b) Wherein the process is as described in claim 11.

If group I is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. During a telephone conversation with Janelle Stode on 3/31/03, a provisional election was made with traverse to prosecute the invention of Group I, species b), claims 1-9 and 11-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10 and 14-27 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-9 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, from which the balance of the claims depend, recites that the process comprises "contacting a polymerizable aqueous emulsion of at least one non-ionic monomer ... and at least one ionic monomer ... and at least on non-free radically polymerizable acid".

However, the claim also recited that "said non-free radically polymerizable acid is contacted with said polymerizable aqueous emulsion ...".

It is unclear how the non-free radically polymerizable acid is to be contacted with the polymerizable aqueous emulsion when the polymerizable aqueous emulsion, as defined earlier in the claim, already contains the non-free radically polymerizable acid. It is therefore unclear what process applicant is claiming.

Claim 11 is further indefinite since it recites that the non-free radically polymerizable, already contained in the polymerizable aqueous emulsion of claim 1, "is contacted with" the polymerizable aqueous emulsion.

9. No useful prior art search/determination was possible due to the general indefinite nature of the claim as indicated above.
